Summary

Motivated Java Full Stack Developer and Computer Science Engineering student. Seeking opportunities to further develop my skills and contribute to the company. Strong willingness to learn and contribute, effective communicator with collaborative mindset and strong work ethic.

Skills

Languages: Java, JavaScript

Front-End: HTML5, CSS, React, Tailwind CSS

Back-End: Spring Boot, JDBC, Servlets, Hibernate, WebSocket, RESTful APIs

Databases: MySQL

Projects

AI-Based Healthcare System

Tech: React, Spring Boot, Java, Gemini AI, Docker

- Engineered a full-stack health management platform featuring a secure Medical Vault for users to centrally upload, store, and manage personal medical documents.
- Integrated Google Gemini AI to automatically extract complex vital signs (BP, Pulse, SpO2, BMI) from uploaded medical reports and provide a statistic report having a comparison with the normal ranges.
- Developed an AI-powered Symptom Checker chatbot for intelligent health analysis, and deployed the full application to production using Docker, Render, Vercel, and Aiven Cloud.

AI-Powered Gym Tracker

Tech: React, Spring Boot, Java, Gemini AI, Docker

- Engineered a full-stack fitness platform (React, Java/Spring Boot) featuring a real-time health dashboard, an interactive Exercise Vault, and secure authentication.
- Integrated Google Gemini AI as a virtual personal trainer to deliver highly customized workout routines and dietary guidance.
- Containerized and deployed the application to production using Docker, Render, Vercel, and TiDB Cloud (Serverless MySQL).

Craves – Full-Stack Food Delivery Application

Tech : React.js, Spring Boot, MySQL, Vite, REST API

- Developed a responsive food delivery platform using a React.js frontend and a Spring Boot backend, ensuring seamless communication via RESTful APIs.
- Built features to browse restaurants and food items with filtering capabilities (Cuisine, Veg/Non-Veg) and real-time search.
- Integrated a persistent shopping cart using React Context API and developed a backend order processing system to handle checkouts and order history.

Certifications

Full Stack Web Development Certification: Tap Academy (2026).

Education

B.E : Computer Science & Engineering	2021-2025
P.E.S College of Engineering	7.85 CGPA
XII Department of Pre-University Education	2021
Vivekananda PU College	84.9%
X Central Board Of Secondary Education	2019
Maharshi Public School	75%

Hobbies

Photography, videography, Video Editing, Travelling, Reading Manga.
